

Treatment Report

Module Description:

In this module students will review the basics of MRK and ADDIE and learn the basics of Agile Instructional Design (ID). Students will also learn how the three models relate and best practices for when to use which.

Order of progression:

The student will start with reviewing MRK and then progress to reviewing ADDIE. After the review the student will progress to Agile ID. The Agile module will teach the student the history of Agile development and the basic building blocks of Agile ID. After going through Agile ID the student will learn how it relates to the reviewed models and which to use based on circumstances. The module will be linear but will allow the student to go back and review material.

Features:

- The module will have options for moving forward and backward in the course.
- Students will have access to help options.
- There will be a resource section available including references
- Appropriate animations
- Graphics
- Narration
